EXPERT SELECTION FOR CREATIVE IDEAS

antalis <sup>SM</sup>

#### • LARGE FORMAT

##### **Large format media for great ideas**

For the last 10 years, our expertise has allowed us to build one of the widest large format visual communication ranges on the market. Coala media has been tested and chosen for its optimal reproduction ability, technical qualities and versatility, offered in a wide range of sizes and finishes for all print technologies.

#### • INNOVATION

##### **One step ahead**

Our experts listen to your needs before traveling the world, meeting with manufacturers, production specialists and design engineers, as well as visiting trade shows to select and test new visual communication media. This continuous trend monitoring ensures that we can provide market leading solutions to our clients.

#### • ICC PROFILES

##### **Colour reproduction support**

We all know that in our creative businesses, poor reproduction quality can ruin remarkable creative ideas. Together with one of the world's leading colour specialists, we supply ICC profiles that allow you to achieve the colour accuracy and print quality your ideas deserve. They are available for free at [www.colorbase.com/profile-search/](http://www.colorbase.com/profile-search/)

#### • INDOOR/OUTDOOR

##### **Ideas without boundaries**

The Coala range consists of more than 200 media options that suit both indoor and outdoor applications. Our materials are developed to meet the technical requirements of indoor communications and the resistance of outdoor environments, allowing you to deploy your campaigns for signage or visual merchandising across all touch points with the same level of quality.

#### • VALUE FOR MONEY

##### **Premium quality at Coala prices**

We are proud of the superior quality achieved for one of the best performance/price ratio ranges on the market for all our Coala media. This is the result of 10 years of expertise, partnerships and collaborations with leading and trustworthy manufacturers to meet your expectations.

#### • EASY APPLY

##### **Saving you time and money on installation**

Rolling out a national campaign on deadline is a challenge for most brands! For visual communication materials installed by point-of-sale staff or under time pressure, we offer a choice of adhesive materials that are quick and easy to apply for quality campaigns.

#### • FLOOR GRAPHICS

##### **Want safety and aesthetics?**

Floor graphic textures, colours and messaging for demarcation and directional signage are effective communication tools. Our textured and non-slip floor coverings are easy to print, robust, adhere to almost any surface and are easy to apply.

#### • MAGNETICS

##### **Want your communication to be magnetic?**

Coala Magnetics is a durable and waterproof range of innovative synthetic films for eye-catching displays.

Place, replace and renew your regular marketing messages such as sales promotions with ferrous film on an adhesive magnetic base or magnetic film on adhesive ferrous base, choose the option that suits you best!

#### • INTERIOR DESIGN

##### **Tailored creative solutions**

Coala can help you create unique, personalised and enjoyable spaces that enhance interiors. We provide customised decoration solutions such as architectural films, window films and wallcoverings for a range of environments such as hotels, restaurants, shops, museums, airports and hospitals.

#### • SUSTAINABILITY

##### **Switch to green with Coala**

Sustainability is at the heart of the development of our range. Our expanding portfolio of more environmentally friendly substrates provides customers with solutions that help protect our planet. Based upon material makeup and recyclability, our unique Green Star System™ rates products from zero to five stars, making it easy to identify and choose more sustainable materials.

## INTERIOR DESIGN

## INTERIOR DESIGN IS A GROWING TREND WITH AN EMPHASIS ON PERSONALISATION

Interiors provide an opportunity to evoke emotions, whether it is in a retail space, hotel, office, restaurant or at home. Considered interior décor can help tell a story, create comfort or inspire creativity.

Just as a logo, typeface and imagery are important elements of brand communication, the dressing of rooms can ignite customer attraction, reinforce brand identity and generate loyalty. It can equally inspire and motivate employees.

Antalis has included a range of printable products for decoration under its Coala brand. To help you quickly identify the most suitable products for your project, you will find a **DECO** symbol in your Coala swatch book that indicates its suitability

for wall coverings, window films, acoustic solutions, floor adhesives, repositionable films, and more. These products have been carefully selected for specific applications based upon their technical and aesthetic qualities for interior projects.

The Coala portfolio includes solutions for upcycling walls, doors and furniture with Coala Interior Film products available in various beautiful effects including stone, leather and wood. Coala Windows Décor offers finishes for glass surfaces, providing both decorative installations as well as privacy measures.

**We hope that our selection will inspire you in the transformation of your spaces.**

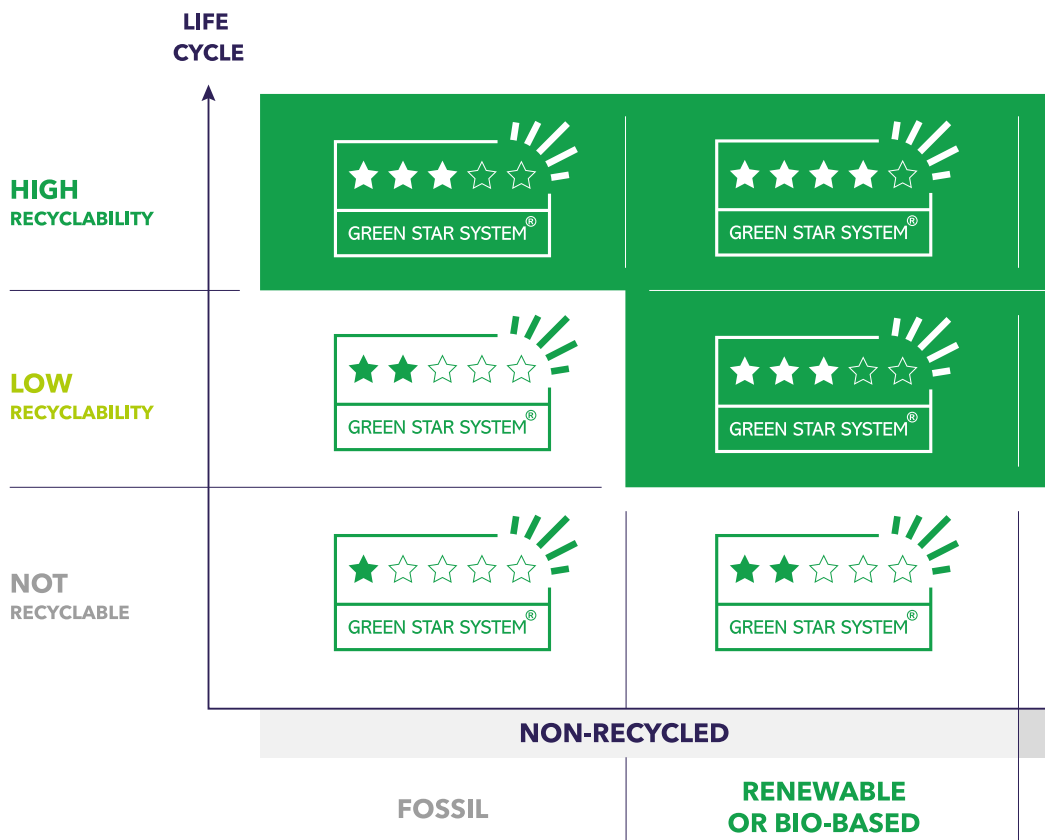

## LET'S ACT TOGETHER FOR MORE SUSTAINABLE VISUAL COMMUNICATION

It's time to accelerate our transition to **eco-responsible signs and displays**. To drive meaningful change in visual communication, Antalis has created a framework that aims to **educate, measure, provide and assist**.

### AN OBJECTIVE **RATING SYSTEM**

The **Antalis Green Star System™** for Visual Communication provides an objective rating system and makes it easier for companies to act in favour of sustainability. By choosing products that rank

high in this **0-to-5-star system**, you'll benefit from eco-responsible solutions that combine **practicality, efficiency and sustainability**.

## A MOVE TO SUSTAINABLE SOLUTIONS WITH HIGH PERFORMANCE

To help you achieve higher ratings in the Green Star System™, we're working to develop eco-responsible alternatives for all applications, across our entire product portfolio.

Our goal is to help you move from today's composite materials, PVC-based, none recyclable materials to PVC-free, easier to recycle fibre-based, bio plastics, and ultimately recycled materials.

You will find the sustainable alternatives ranking 3 stars and above indicated in the swatchbook. Look out for the Green Star symbols.

In the Coala range, we also have a large selection of sustainable alternatives to rigid synthetic materials, just ask your Antalis contact for further details.
